

CIS*4030 – Mobile Computer – Exercise Twelve: Serialization

For this week's exercise you will be adding functions for json serialization (both a toJson and fromJson function).

Weight: This exercise is worth 4% of your final grade and is due during class time with a two week window for submission. For this exercise since it will officially be assigned on March 12, 2024, you have until April 3, 2024 to submit this exercise.

In this week's exercise you will be adapting the pre-existing code for the recipe application to load in data using a fromJson function (if you don't already) and will be adding functionality to store an updated file using a toJson function.

Submission

To submit this exercise, you will need to show the core functionality of the application, the code for both the toJson and fromJson functions, and finally, the updated json file.
