

## CIS\*4030 – Mobile Computer – Week Eight: State Management

For this week's exercise you will be utilizing state management to update the state in the recipe application that you have been updating for the last couple of exercises.

**Weight:** This exercise is worth 4% of your final grade and is due during class time (on Monday's and Wednesday's) with a two week window for submission. For this exercise since it will officially be assigned on February 5, 2024, you have until March 4, 2024 to submit this exercise.

In this exercise you updating the favourite functionality to now update with the use of state management (you can use any state management package of your choice). In other words you should not be passing around a list of favourited recipees.

### Submission

To submit this exercise, you will need to show the functionality on a simulator, and you must show and explain the code that you made to manage the state of the favourited recipes.
