

CIS*4030 – Mobile Computer – Exercise Eleven: Animations

For this week's exercise you be creating a start-up page (i.e., the screen a user sees when they first open the app) for the recipe application.

Weight: This exercise is worth 4% of your final grade and is due during class time with a two week window for submission. For this exercise since it will officially be assigned on March 12, 2024, you have until April 3, 2024 to submit this exercise.

In this week's exercise you will be creating a start-up page for the recipe app and then adding animations to it to enhance the experience in provides. The start-up page has four requirements:

- 1) you must display a title (Note: The title can be anything) for the application and a sign-in button.
- 2) You must have one animation for each component/widget (i.e., for the title and button) that must trigger on start-up of the application.
- 3) Once the sign-in button has been pushed you must have another set of animations to dismiss each component/widget (i.e., an animation for both the title and button). Finally, after the content is dismissed you must either transition to the main page of the recipe application or a blank application screen.
- 4) Add some styling to the button, title or background of the application to make it look nice.

Submission

To submit this exercise, you will need to show me the app running on a simulator during class time.
